

Disruptive Innovation:

How GE reinvents itself to be fit for the future – and how Hungary and GE can benefit each other?

Joerg Bauer

Miskolc, 4. September 2015

We Are GE

We are 300,000 people operating in 175 countries
Inventing the next industrial era to build, move, power, and cure our world

Imagining things others don't | Building the things others can't | Delivering outcomes that make the world work better

Our Businesses deliver value

Revenue: \$27.6B
Profit: \$5.4B

Leading globally in power generation & water technologies

Revenue: \$18.7B
Profit: \$2.6B

Pushing the boundaries of technology in oil & gas to bring energy to the world

Revenue: \$7.3B
Profit: \$0.2B

Enabling utilities and industry to efficiently manage electricity from the point of generation to the point of consumption

Revenue: \$24.0B
Profit: \$5.0B

Providing our aviation customers with the most technologically advanced & productive engines, systems & services for their success

Revenue: \$18.3B
Profit: \$3.0B

Developing transformational medical technologies & services that are shaping a new age of patient care

Revenue: \$5.7B
Profit: \$1.1B

Being a global technology leader & supplier to the railroad, mining, marine, stationary power & drilling industries

Revenue: \$8.4B
Profit: \$0.4B

Answering real-life needs, defining trends & simplifying routines. Leading a global lighting revolution to deliver innovative solutions

Investing financial, human & intellectual capital to help our customers build their businesses

What is economic thinking all about?

Maslow Pyramid

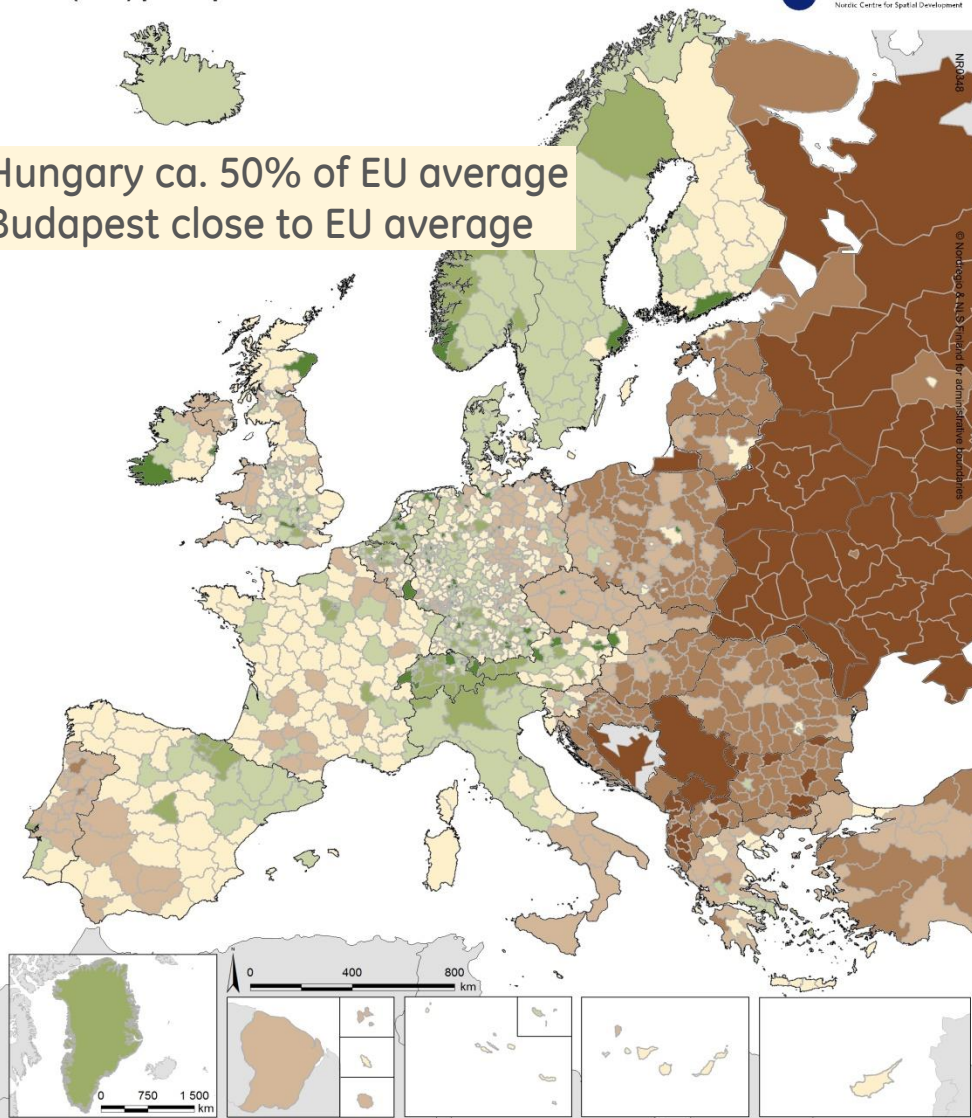

GDP (PPS) per capita in 2010

Hungary ca. 50% of EU average
Budapest close to EU average

Gross Domestic Product (GDP) per capita in Purchasing Power Standards (PPS) for 2010 at the regional level in Europe
EU27 = index 100

Industrial Internet

Figure 1. Rise of the Industrial Internet

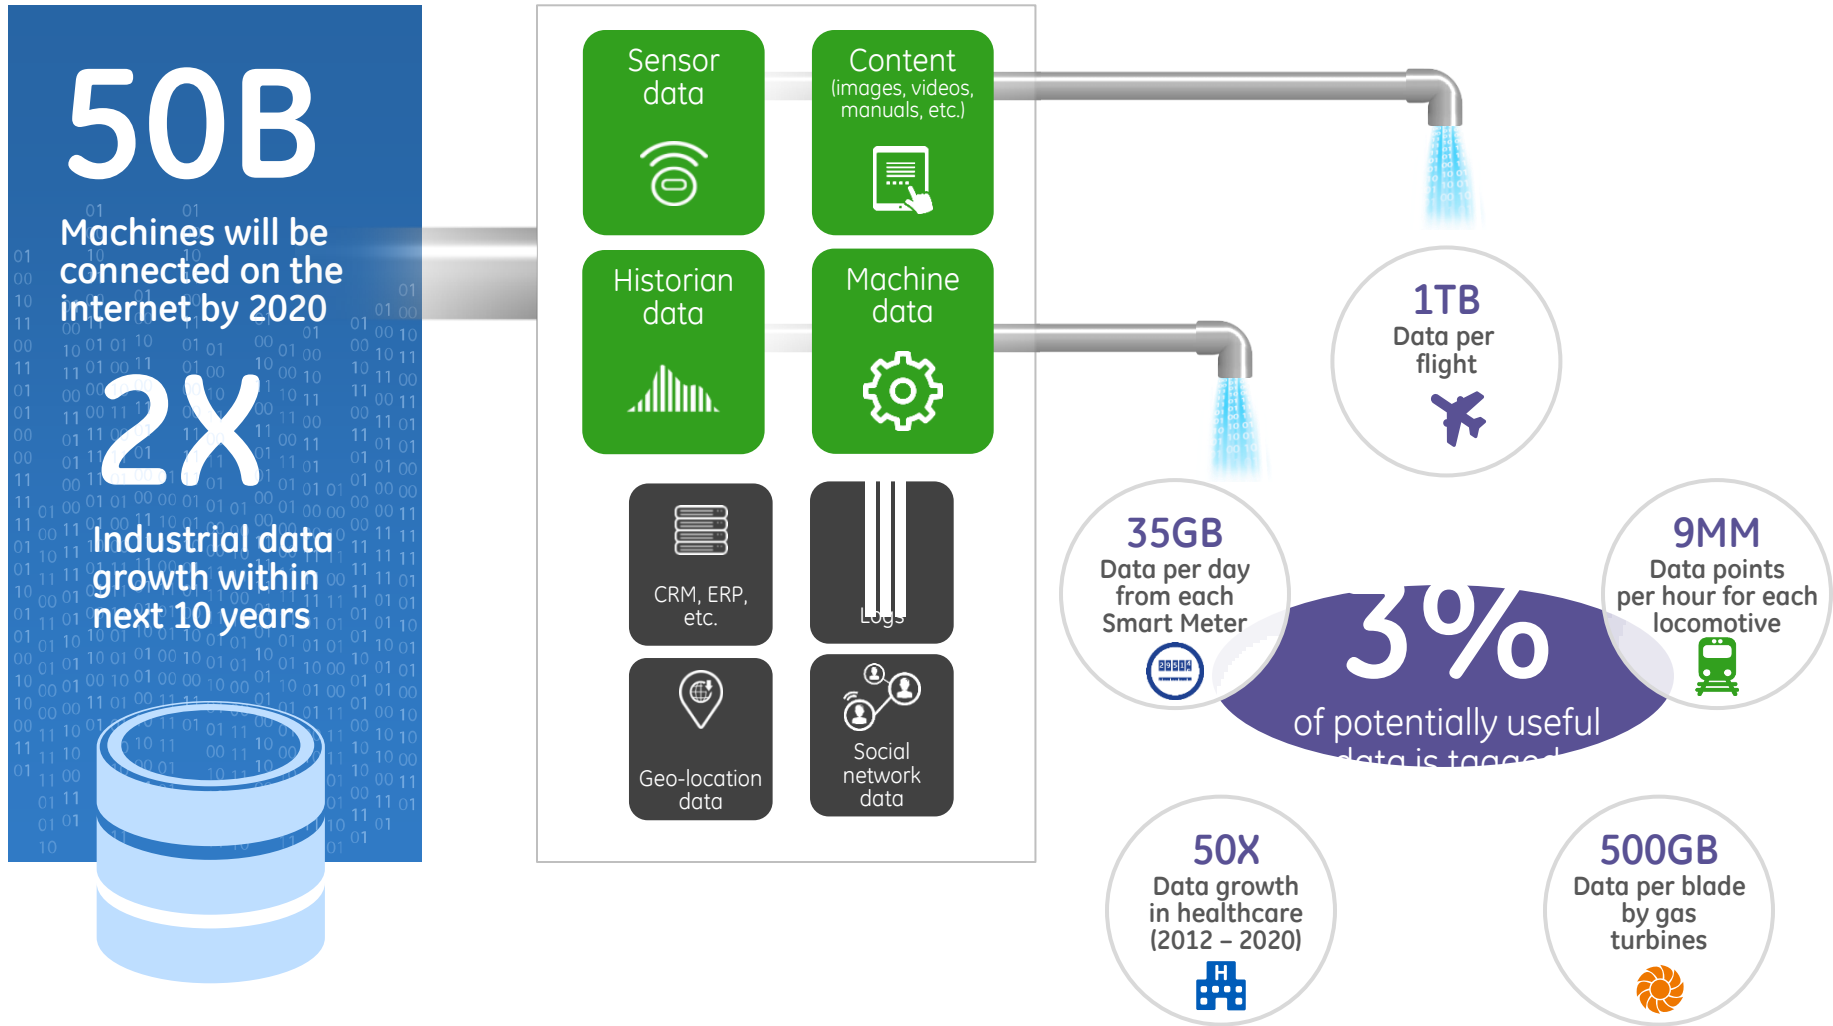

Industrial Internet is here

Sources: Cisco, Harbor Research, <http://www.futuristspeaker.com>

Industrial Big Data – fast and vast

*Source: IDC

A Boeing jet generates 10 terabytes of data per engine every 30 min of flight, 28,537 flights per day in the US alone = 833.280.400 terabyte per year = 833.280 Petabyte = 833 Exabyte (every flight = 1 hour)

Library of congress
All words ever spoken

3 Petabyte
5 Exabyte

- 8 bits = 1 byte
- 1,000 byte = 1 kbyte 1,000
- 1,000 kbyte = 1 Mbyte 1,000,000
- 1,000 MByte = 1 GigaByte 1,000,000,000
- 1,000 GByte = 1 TeraByte 1,000,000,000,000
- 1,000 TByte = 1 PetaByte 1,000,000,000,000,000
- 1,000 PByte = 1 Exabyte 1,000,000,000,000,000,000
- 1,000 EByte = 1 Zettabyte 1,000,000,000,000,000,000,000
- 1,000 Zettabyte = 1 YottaByte 1,000,000,000,000,000,000,000,000

Forces shaping the Industrial Internet

1 Internet of things
A living network of machines, data, and people

2 Intelligent machines
Increasing system intelligence through embedded software

3 Big Data
Transforming massive volumes of information into intelligence

4 Analytics
Generating data-driven insights and enhancing asset performance

GE and Hungary

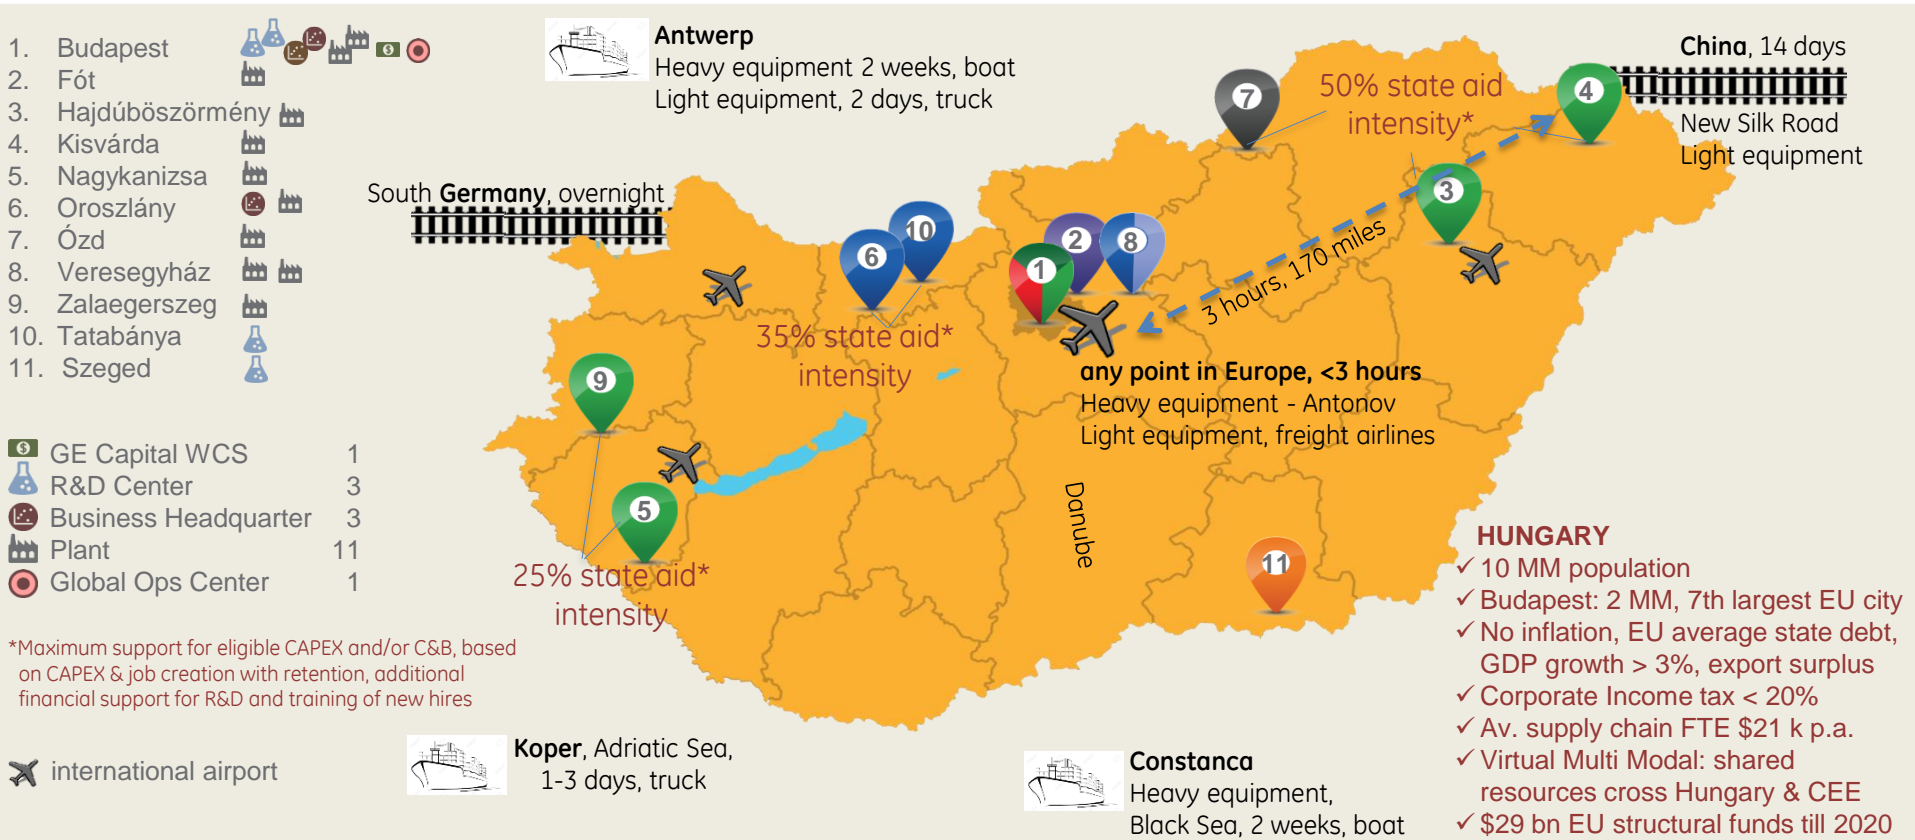

GE in Hungary:

developed Europe education, productivity, IP safety, and infrastructure @ developing Europe cost and flexibility

• Global Operations • Lighting • Power & Water • Healthcare • Oil & Gas • Aviation • Energy Management • Capital

GE Hungary figures

- ❖ **7 of 8 GE businesses** present in **11** cities with **11,000+** employees: ~9.500 industrial, 1,200 Global Ops, ~500 R&D
- ❖ **3rd largest Hungarian company**, \$6.5 bn industrial revenue, **99% export**; low landed cost to GE growth markets
- ❖ **1.200+ qualified suppliers** = \$900 MM local purchases, 65% of GE Hungary's external needs, **strong EXIM HU**
- ❖ **Global Operations Center, Budapest:** one of GE's 5 global centers, hired **>1,000 new employees** from January 2014
- ❖ **PREDIX for Healthcare**, >50% state funded: 170 software engineers & 3 universities; **total ~600 IT staff in country**

Selected Academic Partnerships in Hungary

- ~ 14 academic sites
- ~ + 15 R&D Projects
- ~ 500+ internal / 100+ Researchers
- ~ + \$ 40 m Funding (2012-2017)
- ~ annual 80 Talents
- ~ Patents & Publications

- GE Healthcare** Semmelweis University **1** R&D Collaboration (Genetics, TBI) CaseXchange Project (HIP) Oncology Project Research & Trials SMEs, Intern program

Summary & Conclusion

Productivity (driven by augmentation) is the basis of increased standard of living. We experience substantial improvements within one generation.

Individuals, Companies, States, Europe have to assess their capabilities to succeed in a rapidly changing world & derive necessary reforms

Historically changes have resulted in winners and losers – opportunities and challenges for all of the above players.

There will be very few areas without heavy IT impact: Can Hungary be the 'Switzerland of IT'?

GE is embracing disruptive technologies and investing in Industrial Internet globally and in Hungary; GE turns innovation into global products

Clusters consisting of public, academics, SME & start ups and large enterprises will be one of the tools to create economic value – **GE Hungary is ready to take an active role.**
